

Let's Stop HIV Together

AIDS is a chronic immune system disease caused by the human immunodeficiency virus (HIV).

HIV damages the immune system and interferes with the body's ability to fight infection and disease. HIV can be spread through contact with infected blood, semen, or vaginal fluids. There's no cure for HIV/AIDS, but medications can control the infection and prevent disease progression.

LOCATION

**Portsmouth Department of Behavioral
Healthcare Services – Prevention Unit**

1811 King Street • Portsmouth, VA 23704
